10 FACTS to CONSIDER WHEN BUYING an INFLATABLE BOAT...

1. **THE DEALER** - Who can service your needs best? Someone who deals only with Inflatables, a boat dealer, or a retail store salesperson?
2. **THE FEATURES** - The quality of name brand products is much the same with all inflatable boats. It is the various features and accessories that influence the price variations and your choice as to need.
3. **LIFE-SPAN** - Before buying consider how long will the product last.
4. **MAINTENANCE** - What will it cost to properly maintain the product?
5. **CONSTRUCTION** - Learn about the product before you buy. Inflatable construction is important. Ask your sales person!
6. **SERVICE** - Everyone buys with the hope that their purchase will be trouble free, but, if there are servicing needs a local dealer can save you valuable time, money, and inconvenience.
7. **COMFORT** - The larger the tube diameter, the dryer and more comfortable the ride.
8. **MAINTENANCE** - Foldable wood floors require more maintenance than plastic. Fiber-glass floors and rigid hulls require even less.
9. **THE USAGE** - A dinghy can be the major parts of a cruise, it's your car on the water. Buying a reliable and enjoyable dinghy is important to your trip, and added fun to your water activities.
10. **MARITIME SOLUTIONS** - Remember Maritime Solutions when shopping. We're here to help you make the RIGHT choice!
